

Ukrainian Oshadbank: Complex IT-System

The customer

Over the course of just a month, S&T developed and implemented a very special data system for Oshadbank, the largest state-owned bank in Ukraine: this system will be used to handle compensation payments to all Ukrainian citizens who invested money in the former USSR State Savings Bank.

The challenge

It was necessary to design, implement and launch the system, named the 'Register of the Investors of the former USSR State Savings Bank', in less than one month whilst taking into account special requirements such as high availability and reliability, capacity planning to allow expansion, supporting a high number of users simultaneously, and the use of a combination of proven and cutting-edge equipment and technologies.

The project

S&T Ukraine was awarded the highly sensitive contract together with its partners EMC and UNITI-BARS. The project is centered on a consolidated database containing data about all Ukrainian citizens who had saved in the USSR Savings Bank, as well as all the data relating to compensation payments. The system simultaneously processes enquiries in real-time from across Ukraine and has a business intelligence solution as well as a reporting function in order to fulfill the various requirements of the bank and regulatory bodies.

Benefit to the customer

- processing of enquiries in real-time
- top quality banking services
- high availability and reliability of banking services
- capacity planning allows extension of users

„The implementation project for the 'Register of the Investors of the Former USSR State Savings Bank' information analysis system represents a special phase in the development of the IT infrastructure at Oshadbank in Ukraine. The social importance of the issue placed great demands on the system to ensure payment of compensation to investors in the former USSR State Savings Bank, particularly in terms of reliability, scalability, functionality and, not least, in terms of the implementation conditions. The highly effective cooperation between Oshadbank and our reliable partners made it possible to solve the problem successfully and to thereby fulfill all the fundamental requirements. Oshadbank has again demonstrated that its infrastructure is well placed to provide top quality banking services with high levels of speed and accuracy to the whole of Ukraine.”

Anatoliy Solodovnik, Deputy Chairman of the Oshadbank Board

S&T Ukraine

S&T entered the Ukrainian market in 1993. In 2000 S&T took over Soft-Tronik. S&T Soft-Tronik is one of the largest system integrators in the Ukraine and a leading provider in the networks, financial services and telecommunications sectors. Its 198 staff in two offices in Kiev manage notable clients, e.g. Kievstar GSM, the National Bank of Ukraine or Antonov ASTC. S&T Ukraine has received many certifications and awards, enjoying an excellent reputation due to its high level of quality and professionalism.

S&T Ukraine belongs to the S&T Group, which, with more than 3,100 employees in 22 countries and annual sales in 2007 of 522,2 million Euro, is the leading provider of IT consultancy, solutions and services for customers in Central and Eastern Europe, in the Germany-Austria-Switzerland (DACH) region and in China and Japan.
